

CANNON MID AND SMALL CAP H4 FUND A1

Minimum Disclosure Document

cannon asset managers

DELIVERING VALUE

October 2017

Issue date: 15 November 2017

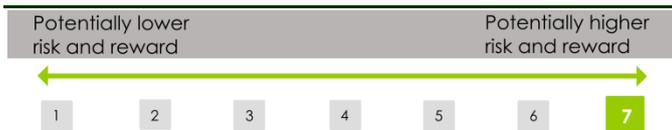

INVESTMENT OBJECTIVE

The objective of the Cannon Mid and Small Cap H4 Fund is to achieve maximum capital appreciation over the medium to longer term.

POLICY

The fund aims to achieve its stated objective by investing in companies, with small- to mid-sized market capitalisation, primarily listed on the FTSE/JSE All Share Index. These companies display the potential to deliver above average earnings growth. The shares fall outside of the parameters of the JSE Top 40 Index by virtue of their market capitalisation. This portfolio may invest in unlisted financial instruments for the purpose of efficient portfolio management only.

RISK REWARD PROFILE

This portfolio invests predominantly in South African listed equity securities with small- to mid-sized market capitalisations. In terms of the above risk reward profile, the portfolio has the highest risk rating due to the nature of its investments, which may be subject to risks which include, but are not limited to, adverse local stock market conditions, political and macroeconomic events, company earnings and significant corporate events. Shares can be volatile investments and smaller companies may be particularly sensitive to the prevailing market environment. Please refer to the additional risks highlighted in the Information and Disclosures section.

FUND PERFORMANCE

Performance information may only be made available after the fund has been in existence for more than one year.

Metrofile Holdings Ltd	3.6%	Holdsport	3.6%

FUND COMMENTARY

The South African equity market staged a strong recovery in October, with the FTSE/JSE All Share Index (ALSI) delivering 6.3%. Blue-chip large cap stocks rallied 6.7%, while mid- and small caps managed returns of 4.1% and 2.6% respectively. ALSI heavyweight, Naspers, was the main performance driver, resulting in industrials gaining 7.6%. Resources rose 7.1% while financials trailed at 2.5% for the month. While the mid- and small cap counters bounced back in October, their year-to-date returns of 0.2% and 1.9% apiece are in stark contrast to the ALSI's return of 19.6% over the period. It is clear that these returns are predominantly driven by non-SA related companies, whereas the mid- and small cap universe is probably a truer reflection of the current economic conditions in South Africa.

The biggest contributors to the Cannon Mid and Small Cap H4 Fund's ('the fund') performance in October were Group Five (+19%), Metrofile (+13%) and Pan African Resources (+13%). The largest detractors were Calgro (-20%), Silverbridge (-16%) and Howden (-13%). The managers have diversified the fund to hold a number of companies with large offshore exposure, and remain cautious in the short to medium term, given the volatility in the mid- and small-cap universe, and as negative sentiment lingers around South Africa.

The fund continues to adhere to its policy.

MONTHLY PERFORMANCE TABLE

Performance information may only be made available after the fund has been in existence for more than one year.

TOTAL INVESTMENT CHARGES:

Three year annualised as per ASISA Standard

Period (annualised)	01 March 2017	to	30 September 2017
Class A1 Distributing	Total Expense Ratio (TER)	Transaction Costs (TC)	Total Investment Charges (TER + TC)
	1.85%	0.04%	1.89%
	of the value of the fund was incurred as expenses relating to the administration of the fund. No performance fees are charged.	of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund	of the value of the fund was incurred as costs relating to the investments of the fund

The TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.

TOTAL EXPENSE RATIO:

One year, as at financial year-end, as per Board Notice 92 of 2014: not yet available

INFORMATION AND DISCLOSURES

About the manager, trustee and scheme

This portfolio was established by H4 Collective Investments (RF) (Pty) Ltd, registration number 2002/009140/07 ("the manager") of The Citadel, 15 Cavendish Street, Claremont, 7708 (telephone +27 21 670 9100) as part of the H4 Collective Investments Scheme ("the scheme"). The trustee of the scheme is the Standard Bank of South Africa Limited of 9th Floor, Standard Bank Centre, 5 Simmonds Street, Johannesburg, 2001 (telephone +27 11 636 9111/2).

About the investment manager

The manager has appointed Cannon Asset Managers Proprietary Limited, registration number 2000/025176/07 ("Cannon"), as the investment manager of the portfolio. Cannon is licensed as a financial services provider in terms of the Financial Advisory and Intermediary Services Act, 2002.

Risk warning

The risk and return profile of a fund illustrates the amount of risk undertaken by an investor in the hope of achieving a particular return on an investment. The generally accepted principle is that potential return rises with an increase in risk. The risk and return profile on the face of this document is based on the historical performance of the fund. In addition to the risk warnings included elsewhere in this document, it is important to note that there are many other risks associated with investing in collective investments. These can include but are not limited to the following: general market risks (such as general movements in interest rates; external factors [war, natural disasters and such like]; changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments), risks related to a specific security (like the possibility of a company's credit rating being downgraded); and loss in the purchasing power of an investment as a result of an increase in the price of consumer goods (known as inflationary risks).

Some of the portfolios may invest in foreign securities. There are potential material risks associated with investing in foreign securities. These include but are not limited to: potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political and social instability, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information, all of which may have an impact on fund performance. In addition, risks associated with investing in emerging markets (which are generally less mature than those in developed markets) include but are not limited to currency risks, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country.

Derivatives

If this portfolio has exposure to derivatives, this fact and the level of exposure will be specified within this document. Where this fund invests in other funds which use derivatives, those underlying derivative exposures will not be contained in this document. Derivatives derive their value from the value of an underlying asset. Investing in derivatives involves risk because depending on how the derivative is structured, the portfolio's losses or gains may be unlimited. To prevent this, the portfolio's derivative positions must be "covered" at all times. This means that the portfolio must always hold the underlying asset on which the derivative is based, or have sufficient cash or "margin" to deliver if the portfolio's derivative positions move against it. The use of derivatives in collective investment schemes is governed by regulation. Derivatives can be used only for efficiency in portfolio management, for increasing a portfolio's yield, or to protect the portfolio against losses if the value of the shares or instruments invested in, or the market, falls. They may not be used for speculating or for enhancing the return of the portfolio by using gearing. The most common derivatives are options (puts and calls) and futures.

General disclosures

This document is the minimum disclosure document required by Board Notice 92 of 2014 published by the Financial Services Board under the Collective Investment Schemes Control Act 45 of 2002. Collective investment schemes are generally medium to long-term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective Investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commission is available on request from the manager. Neither the manager nor Cannon provides any guarantee either with respect to the capital or the return of the portfolio. The manager has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. Where any forecasts or commentary about the expected future performance of asset classes or the market in general are made in this document, please note that neither Cannon nor H4 guarantee that such forecasts or commentary will occur.

Performance disclosures

The performance calculated and shown is that of the portfolio. Individual investor performances may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment and dividend withholding tax. Where periods of longer than one year are used in calculating past performance, certain figures may be annualised. Annualisation is the conversion of a rate of any length of time into a rate that is reflected on an annual basis.

Performance fees

The Cannon Equity H4 Fund charges a performance fee of 15% of the excess total return above the FTSE/JSE All Share Total Return Index over a rolling 1-year, capped at 1% p.a. The performance fee is calculated daily and deducted monthly on a high-water mark principle.

Disclosures in respect of third-party-named portfolios

This portfolio is a third-party-named portfolio. A third-party-named portfolio bears the name of both the manager and the investment manager. The manager retains full legal responsibility for the third-party-named portfolio.

DELIVERING VALUE

October 2017

Issue date: 15 November 2017

Calculation of the NAV and price

The value of participatory interests is calculated on a NAV basis. The NAV is the total value of all assets in the portfolio including any income accruals and less any deductible expenses (which may include audit fees, brokerage, service fees, securities transfer tax and bank charges). The price of participatory interests is calculated by dividing the NAV by the number of participatory interests in issue. Prices are published daily in local newspapers. The portfolio is available via certain LSPs, who levy their own fees. Investors in this portfolio may thus be liable for an initial fee and/or annual service fee levied by the third party administrator that is not reflected in the initial charge (where applicable) or NAV calculation.

Limitation of liability

This document has been compiled for information purposes only and does not take into account the needs or circumstances of any person or constitute advice of any kind. It is not an offer to sell or an invitation to invest. The information and opinions in this document have been recorded by Cannon and the manager in good faith from sources believed to be reliable, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Cannon and the manager accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use of this document or its contents.

Complaints process

Any complaint must be set out in writing and include all relevant information and documents in the complainant's possession. The complaint must be addressed to the manager's compliance officer and posted or hand-delivered to the manager's physical address above or sent by email to info@H4CI.co.za. The complaint will be investigated internally and the complainant will be advised of the outcome of the complaint.
