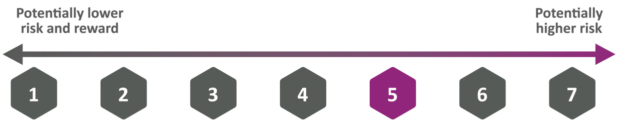
Minimum Investment	Segregated Portfolio: R150,000 TFSA: None Required

ACCESS

Direct (Segregate Portfolio)	0.65% (excl. VAT)
Platform	EasyEquities

RISK-REWARD PROFILE



INVESTOR PROFILE

The Assertive Growth Portfolio suits investors with an investment horizon of at least five years who are looking for long-term growth ahead of consumer price inflation and who can tolerate short-term portfolio volatility associated with an assertive investment mandate.

STRATEGY AND OBJECTIVES

The Assertive Growth Portfolio uses a flexible approach to invest across all major asset classes, including equities, property, bonds, commodities and cash to produce long-term returns ahead of inflation plus five percent (CPI + 5%). The portfolio may be aggressively managed, with underlying assets being shifted between different markets and various asset classes to reflect changing economic and market conditions. The portfolio manager has complete flexibility in asset allocation between and within asset classes, countries and regions, allowing the manager to tactically vary asset exposure from time-to-time to take advantage of asset class mispricing or to protect investments against market risks.

The portfolio does not comply with the investment limits governing retirement funds (Regulation 28 of the Pension Funds Act). However, in the long run, the strategic allocation targets holding half of the portfolio in South African assets and half of the portfolio in offshore assets.
